### How does a Health Care System Manage its Own Health Care?

FORTUNE Magazine named OhioHealth one of the "100 Best Companies to Work For" in 2007, '08, '09 and '10. In addition, on April 1, OhioHealth hospitals Riverside Methodist Hospital and Doctors Hospital were named to the Thomson Reuters list of the nation's 100 Top Hospitals®, which recognizes hospitals that have achieved excellence in clinical outcomes, patient safety, patient satisfaction, financial performance, and operational efficiency.

Columbus-based OhioHealth is a nationally recognized, not-for-profit, healthcare organization with a family of 18 hospitals, 23 health and surgery centers, home-health providers, medical equipment and health service suppliers throughout a 40-county area. Included in central Ohio are Riverside Methodist Hospital, Grant Medical Center, Doctors Hospital, Grady Memorial Hospital and Dublin Methodist Hospital.

So what's OhioHealth's secret to being named to the list of 100 Best Companies to Work For and two of its hospitals named in the nation's Top 100 Hospitals. Part of the secret can be found in OhioHealth's management of its own employees' health care and its creative and forward thinking executive leadership beginning with **David Blom** president and chief executive officer of OhioHealth. With 15,000 employees and more than \$2.0 billion in net revenue, OhioHealth is devoted to its community mission of improving the health of those it serves.

Blom will briefly discuss his view on the new health care legislation and detail OhioHealth's approach to healthcare for its employees.

David Blom, President & CEO, OhioHealth

Mike Louge, Executive Vice President and CFO, OhioHealth

With support from *Cardinal Health*, *McGladrey* and *Rick Buchanan Photography*

The 100 Top Hospitals treated sicker patients requiring more complex treatment, yet had better patient outcomes and lower costs. If all Medicare inpatients received the same level of care as Medicare patients treated in the winning hospitals:

- More than 107,500 additional patients would survive each year.
- Nearly 132,000 patient complications would be avoided annually.
- Expenses would decline by \$5.9 billion a year.
- The average patient stay would decrease by nearly half a day.

## Facts about OhioHealth

Total admissions	106,280	Total physicians	2,500
